

# Rob Bull

## *From good to great...*

The ability to create high performing teams in today's corporate organisations can't be overlooked. Who better than a Former Royal Marines Commando to offer advice on forming the 'perfect team'.

Be prepared to be sat on the edge of your seat as Rob recounts his own story as leader of the assault team, that was responsible for rescuing 21 hostages from Taliban control in Afghanistan. He utilises this experience and his expertise to teach you how to create the 'perfect team' within your business.

At 18 he passed the arduous selection and went on to join the elite Royal Marines Commandos. During an exciting and varied career, he has been involved in many operations in the Middle East, including Iraq and Afghanistan. During which time he was at the forefront of many conflicts, possessing not only the ability to rapidly build high performing teams but showing extraordinary leadership, under very harsh and stressful conditions.

During the later years of his career Rob spent a great deal of time training specialist Commandos at the Commando Training Centre Royal Marines. This included a wide range of aspects such as weapons, tactics, survival behind enemy lines and unarmed combat. He then progressed onto instructing potential leaders in the basics of good leadership, proficient team building and team dynamics. Using a wide range of action learning techniques he was able to ensure that what was learnt remained with his students. Whilst at the Commando Training Centre he won the prestigious awards for best all round instructor and the centres most inspirational instructor, on two separate occasions.

He is a master of detail and will ensure he knows as much as he can about you and your company, to ensure that every exercise undertaken will immediately be related back to the workplace, with in-depth feedback given in such a manner that it will remain with you for life.

Rob believes that if a person is given the correct skill set and they have the right amount of determination there is no upper limit to the goals they can set and achieve.
